THE UNICELL ADVANTAGE

ONE OF A KIND

Each Unicell van body is created using our patented programmable fiberglass application machine, which enables Unicell to design and build van bodies that are more aerodynamic and better styled than conventional methods and materials allow.

RUGGED

Unicell's unique construction is built to withstand abuse: our fiberglass bodies are tougher and more puncture resistant than .040" aluminum bodies or ½" plywood, leading to fewer ugly dents and costly repairs.

SLEEK

Our bodies are manufactured from one-piece molded fiberglass, which means no seams, caulking, or unsightly rivets, just an uninterrupted, smooth, glossy white gel-coat finish. Unicell bodies look great on their own, or provide the perfect canvas for vinyl graphic wraps.

LIGHTWEIGHT

Unicell presents the best van body choice pound for pound: our bodies are as light as any aluminum sheet and post design but considerably stronger, and they are far lighter than any FRP construction.

LONG-LASTING

Unicell bodies are built to last and backed by our 5-year limited warranty. Our fiberglass design makes repairs quicker and easier than for other constructions, which puts you back on the road sooner. Unicell's reputation for quality results in consistently higher value upon resale.

The AeroCell Transit

In 2014, Unicell worked closely with Ford to develop a seamlessly integrated body for Ford's new Transit cutaway. The Aerocell Transit's aerodynamic design coupled with the Ford Transit's new engine make the Aerocell Transit the most fuel-efficient cutaway on the market. The Aerocell Transit is the natural extension of Ford's sheet metal offerings and is perfect for high-volume, low-weight applications. In such "high-cube" applications, the Aerocell Transit is the better choice dollar for dollar than Ford's factory models, or conventional cube vans with similar GVWR.

The Perfect Tool For

COURIERS

FOOD SERVICES

MUNICIPALITIES

DAILY RENTAL

CONTRACTORS

Standard Features

AERODYNAMICS

Built-in air deflector with storage Curved, aerodynamically designed lower side skirts

BULKHEAD

Bulkhead

BUMPER

Galvanized Bumper

DOOR

Premium quality roll-up rear door

EXTERIO

Fiberglass Construction Gel Coat Surface Fiberglass Rear Frame Steel Sill Protection Anodized Aluminum Rub Rail HD steel understructure Protective undercoating Rear grab handles Tail Lights

FLOOR

1-3/8" spruce plank

INTERIOR

3/8" Plywood Lining on walls Hoop Posts Weatherproof wiring system LED light Rear timer switch Leak-proof integral skylight

By the Numbers

15-20%

Aerocell aerodynamic bodies lead to reported fuel savings of up to 15 - 20% compared with conventional van bodies mounted on the same chassis.

Lengths	WB	Heights		Widths	GVWR
12'	156"	80"	84"	87"	9950 - 11,000
